

The Ohio State University Bulletin is issued at least twenty times during the year, monthly in July, August, September, and June, and bi-weekly in October, November, December, January, February, March, April, and May.

DAYS AND DATES

University Calendar

1915

Entrance examinations, Tuesday to Saturday, June 8 to 12, 8 a. m.

Summer Session, June 21 to August 13.

Entrance examinations, Tuesday to Saturday, September 14 to 18, 8 a. m.

Registration Day—First semester, Tuesday, September 21.

President's Annual Address, Friday, September 24, 11 a. m.

Latest date for registration of candidates for a degree at the Commencement of June 1916, Friday, October 1.

Registration Day, Three-Year Course in Agriculture, First Term, Monday, October 11.

Date for mid-semester reports to the Deans concerning delinquent students, Wednesday, November 17.

Thanksgiving recess begins November 24, 6 p. m., and ends November 30, 8 a. m.

Christmas recess begins Saturday, December 18, 12 m.

1916

Christmas recess ends Tuesday, January 4, 8 a. m.

Registration Day, Three-Year Course in Agriculture, Second Term, Tuesday, January 4.

Final examinations Thursday, January 27, to Thursday, February 3.

First semester ends Thursday, February 3, 6 p. m.

Registration Day—Second semester, Tuesday, February 8.

Washington's Birthday, Tuesday, February 22.

Close of Second Term, Three-Year Course in Agriculture, Friday, March 17.

Mid-semester reports to the Deans, Saturday, March 18.

Easter recess, Thursday, April 20, 6 p. m., to Tuesday, April 25, 8 a. m.

Memorial Day, Tuesday, May 30.

Competitive Drill—Cadet Regiment—Saturday, June 3.

Commencement, Tuesday, June 6.

Final examinations, Wednesday, June 7, to Wednesday, June 14.

Entrance examinations, Tuesday, June 20, to Saturday, June 24, 8 a. m.

Secretary.....CLAIR A. DYE
Office: 109 Chemistry Building—99355
Residence: 1569 Worthington St.—16356

College of Veterinary Medicine

Dean.....DAVID S. WHITE
Office: Veterinary Laboratory—99336
Residence: 1656 Neil Ave.—17508

Secretary.....OSCAR V. BRUMLEY
Office: Veterinary Clinic—99337
Residence: 333 18th Ave.

FOREWORD

This Bulletin contains general information about the Ohio State University and its various colleges, the calendar for the year 1915-16, administration officers, the requirements for admission, the schedule of entrance examination, fees and other expenses, rules and regulations, and student organizations and activities. It is intended primarily for young men and women who desire to enter the University.

On the last page of this Bulletin is printed a list of the Special Bulletins published by the University. These bulletins include the announcement of courses offered in the various colleges, in detail. Every prospective student should consult this list, and send for the Special Announcement of the particular college that he intends to enter. This Bulletin of Information and the Special Announcement contain all necessary information.

The Annual Catalogue is not published for general distribution but any of the Special Bulletins will be sent upon request. All requests for bulletins and entrance information should be addressed to the *Secretary of the Entrance Board, Lester E. Wolfe, Ohio State University, Columbus, Ohio.*

EDITH D. COCKINS,
University Editor

THE OHIO STATE UNIVERSITY

The Ohio State University is supported by appropriations from the State and Federal governments. It is the largest university in Ohio. It ranks eleventh in size in the United States and fifth, among the State universities.

The campus and farm cover 582 acres. The campus proper contains 110 acres. There are thirty-two buildings on the campus, and five residences. The total value of land and buildings is over \$5,000,000. The enrollment in the University November 1st, 1914, was 4943, and the number of instructors and administrative officers numbered 423. The University is open on equal terms to both sexes.

Location

The University is situated within the corporate limits of the City of Columbus, two miles north of the Union Station. The stations of all railway and interurban lines entering Columbus, except that of the T. & O. C. Ry., are near the center of the city and within a square of High Street. To reach the University take a north-bound High Street car and leave it at Fifteenth Avenue or take a north-bound Neil Avenue car and leave it at the end of the line.

The offices of the Entrance Board, the Registrar, the Bursar, and the President of the University are located in University Hall.

Organization

For convenience of administration, the departments of the University are grouped into organizations called colleges. The Ohio State University comprises a graduate school and ten colleges, each under the administration of a Dean and College Faculty, as follows:

Graduate School	College of Engineering
College of Agriculture	College of Homeopathic Medicine
College of Arts, Philosophy and Science	College of Law
	College of Medicine
College of Dentistry	College of Pharmacy
College of Education	College of Veterinary Medicine

SUMMER SESSION

In addition to the above, there is a Summer Session under the supervision of a Director and governing committee for the administration of the regular University courses offered in the summer.

THE COLLEGES

GRADUATE SCHOOL

The Graduate School administers the graduate work offered in the several departments of the University. The School is under the direction of a Graduate Council consisting of a Dean and twelve members appointed from among the departments offering graduate work.

The higher degrees conferred by the University are as follows: Master of Arts, Master of Science, Doctor of Philosophy, and the following professional engineering degrees: Civil Engineer, Mechanical Engineer, Electrical Engineer, Engineer of Mines, Ceramic Engineer, Chemical Engineer, Master of Architecture.

To fulfill the requirements for a graduate degree each student must complete an approved course of study consisting of a major subject and either one or two minor subjects, which are related in general character to the major subject. This course of study is arranged by the student in consultation with the instructor in charge of the major subject. In general about two-thirds of the student's time will be devoted to the major subject and the remaining one-third to the minor subject or subjects.

All communications and inquiries concerning the Graduate School whether from prospective students or from those whose work is in progress, should be directed to the Dean of the Graduate School. A special bulletin describing the work of this school may be obtained by addressing the Secretary of the Entrance Board.

COLLEGE OF AGRICULTURE

The College of Agriculture offers ten distinct courses of study:

FOUR-YEAR COURSES: Agriculture, Horticulture, Forestry, Home Economics and Entomology.

THREE-YEAR COURSES: Agriculture and Horticulture.

WINTER COURSES: Dairying—eight weeks, Agriculture—eight weeks and Poultry Husbandry—eight weeks.

The four-year courses of this college are regular collegiate courses of the University and lead to the degrees of Bachelor of Science in Agriculture, Bachelor of Science in Horticulture, Bachelor of Science in Forestry, and Bachelor of Science in Home Economics.

The three-year courses in Agriculture and Horticulture are adapted especially to the needs and opportunities of farm boys who find it impossible to avail themselves of the four-year course. This course extends through three years of five months each, beginning about October 20, and closing about March 20. The courses are complete in themselves and do not offer preparation for any of the four-year courses.

Winter Courses

The College of Agriculture offers three winter courses for the benefit of those who cannot leave their farm work except during the winter months. These courses are in general agriculture, poultry husbandry and dairying. They begin the first week in January and continue for eight weeks. There are no educational requirements for admission to these courses. Special bulletins describing these courses will be mailed on request.

Extension Courses in Agriculture

Extension Courses in Agriculture are given during the winter months in the various counties of the State. They are one week in length and are designed to give practical instruction in the local agricultural and domestic problems.

COLLEGE OF ARTS, PHILOSOPHY AND SCIENCE

This college comprises those courses of study that are designed to furnish a liberal education in the languages and literatures, the sciences, mathematics, philosophy, history, politics, economics, sociology, and preparation for commerce, law, medicine, philanthropic work, administration, journalism, and the higher positions in teaching.

The completion of the requirements in this college leads to the degree Bachelor of Arts or Bachelor of Science.

Departments

The College of Arts, Philosophy and Science includes work in the following departments: American History, Anatomy, Astronomy, Bacteriology, Biblical History and Literature, Botany, Chemistry, Economics and Sociology, English, European History, Geology, German, Greek Languages and Literature, Journalism, Latin Language and Literature, Mathematics, Military Science and Tactics, Philosophy, Physical Education, Physics, Physiology, Political Science, Psychology, Romance Languages and Literatures, Zoology and Entomology.

COLLEGE OF DENTISTRY

The College of Dentistry presents a three-year course of study in such fundamental sciences as deal with the human body in health and disease, and in all methods of restoration of the mouth and teeth from disease to health. These courses are given in properly correlated laboratory and recitation hours, leading the students to the final clinic courses, where they obtain skill and judgment in all dental procedures, by working for patients.

Dentistry is an allied, or highly specialized branch of Medical Surgery, and all prospective practitioners are required by national and state laws to pass examinations, conducted by licensing boards, before entering their field of labor. It is also almost universally required that applicants, before applying for examination, must have graduated from a reputable dental college.

It has become recognized in the dental educational world, that the present three-year course is inadequate, therefore a four-year course is contemplated in the near future.

COLLEGE OF EDUCATION

This college is one of the officially approved instrumentalities of the State for the professional training of teachers. It offers practical and theoretical courses for the training of high school teachers and

principals, of principals of elementary schools, of supervisors of special studies, of superintendents of school systems, of county and district superintendents, and of instructors in normal schools. Its purpose is to assist the student in the acquirement of a knowledge of the branches which he wishes to teach, to give him a right attitude toward education, and to establish in him a skill in the use of efficient methods of teaching and of supervision.

The effort of the college is to bring into proper adjustment within the limits of a four-year course the academic training, the theoretical professional training, and the practical professional training necessary for a proficient teacher. The completion of the requirements in this college leads to the degree, Bachelor of Science in Education.

Upon the payment of a fee of one dollar to the State Superintendent of Public Instruction such a graduate receives a provisional high school certificate valid for four years. The holder of a provisional certificate, furnishing evidence that he has completed at least twenty-four months of successful teaching, will be granted a life certificate by the State Board of School Examiners.

THE COLLEGE OF ENGINEERING

The purpose of the College of Engineering is to instruct students in the fundamental sciences and arts upon which all engineering rests, and to impart such special and technical knowledge of the various branches of engineering as will enable students to enter them and maintain themselves while gaining their professional experience. In addition, it is believed that the severe mental discipline of the various courses of instruction makes the engineering curriculum fully the equal of any other in general educational value.

Courses Leading to Bachelor Degrees

This college offers instruction in the following important fields of engineering work, which lead to the following degrees:

Bachelor of Architecture, (B. Arch.)

Bachelor of Ceramic Engineering, (B. Cr. E.)

Bachelor of Chemical Engineering, (B. Ch. E.)

Bachelor of Civil Engineering, (B. C. E.)
Bachelor of Electrical Engineering, (B. E. E.)
Bachelor of Mechanical Engineering, (B. M. E.)
Bachelor of Engineering in Mining, (B. E. M.)
Bachelor of Engineering, (B. E.)

Short Courses

The following two-year or short courses, do not lead to a degree, but students completing them are furnished a formal certificate stating the work they have accomplished:

Clay-working, Industrial Arts, Mining.

A two-weeks course in Highway Engineering will be given probably in 1916. It is designed to meet the needs of County Surveyors, County Commissioners, Township Trustees, and Road-drag Superintendents, State Highway Inspectors, and all who are interested in knowing more of good road construction and wish to get some connected and systematic knowledge of the present status of highway engineering.

It was not designed to create highway engineers, but to try to bring home to the people the necessity of using trained and educated highway engineers, if the best results are to be obtained from the expenditures being made for highways.

COLLEGE OF HOMEOPATHIC MEDICINE

The purpose of the College of Homeopathic Medicine is to supply Ohio and the country in general with scientifically trained physicians competent to prescribe according to the law of similars in all branches of the practice of Medicine and Surgery. Its graduates are able to fill any position open to physicians in the field of preventive medicine, institutional work or private practice.

This is the only Homeopathic Medical College in the State of Ohio and is located geographically in the center of Homeopathy in America.

The University supplies every facility for the careful training of its students including the University Hospital located on the campus at Columbus. The clinical material for this Hospital comes not only from the city of Columbus, but from every county in the state. There are also opportunities for clinical study at the State Institution for the Deaf, the Ohio Penitentiary and the University Homeopathic Dispensary in the city.

COLLEGE OF MEDICINE

The aim of the College of Medicine is to train physicians who will have a broad conception of their relations to the people and suffering humanity. The function of the physician is no longer individual and curative but includes sociological problems as well. Upon the doctor, society relies largely for protection. Through measures essentially educational and scientific this is accomplished by the development and enforcement of conditions, that prevent disease.

An effort is made to utilize the immense clinical facilities, that are afforded by hospitals and eleemosynary institutions located in Columbus toward promoting and advancing practical and comprehensive medical instruction.

Recognizing the high educational standards and ideals that should characterize a University Medical College and in conformity with the purpose for which the college was established, the entrance requirements were advanced for the session of 1914-15 to one year of college work and to two years of college work for 1915-16.

COLLEGE OF LAW

The purposes of the College of Law are to impart an accurate knowledge of the principles of the law, to illustrate the application of these principles to the practical affairs of life and to furnish such legal training as will fit students for practice in any part of the country; to teach students both to know and to apply the law.

The completion of the requirements in this college leads to the degree, Juris Doctor or Bachelor of Laws.

COLLEGE OF PHARMACY

The College of Pharmacy aims to furnish a technical and practical training for the pharmacist.

To supply this training numerous laboratories have been provided. These are modern in type of construction and are generously equipped with the apparatus necessary for demonstrating and carrying on the work.

The work of the College, aside from that of pure pharmacy, is co-ordinated with that of the other departments of the University. As a result the students share, not only the advantages of the broadening influence of the contact with the students of the other departments, but also the spirit of a great educational institution; factors of the greatest importance to the student selecting a college for a technical education.

COLLEGE OF VETERINARY MEDICINE

The aims of the College of Veterinary Medicine are as follows:

1. To fit its students for the regular practice of veterinary medicine.
2. To offer the special training necessary to equip its graduates for positions in Federal Civil Service and for state and municipal inspectors.
3. To provide opportunity for graduate work for those who contemplate research work or teaching.

The location of the College in a city of about 200,000 inhabitants makes possible a combination of theoretical and practical training in the study of animal diseases. From the city are brought to the clinics horses, dogs, and other pet animals, while from the adjacent agricultural country come the meat and wool-producing animals for treatment. In larger cities these latter animals are not so readily available for clinical study.

THE SUMMER SESSION

The University maintains a Summer Session of eight weeks in which many regular courses are offered, and in addition special courses that are not given during the regular college year. The administra-

tion of the work of the Summer Session is under the charge of a Director to whom all correspondence should be addressed.

The Summer Session of 1915 begins June 21st and ends August 13th.

The primary purpose of the Summer Session is to meet the needs of (a) Superintendents, High School Principals, Supervisors and teachers; (b) graduate students; (c) undergraduate college students and prospective college students who desire to earn advance credit and thus shorten the time they must spend in college, or lessen the amount of work they must carry during the regular college year; (d) special students over 21 years of age who may wish to pursue special work during the summer months.

One special aim of the Summer Session is to place the equipment of the University at the service of those who cannot attend during the regular University year.

All students who attend the Summer Session are registered in one of the regular colleges of the University, determined by the field in which they wish to study or the purpose they have in view. For requirements for admission see page 32.

Courses are offered in the Summer Session by the College of Agriculture, College of Arts, Philosophy and Science, College of Education, College of Engineering, College of Pharmacy, and the Graduate School.

Courses Offered in the Summer Session

In the College of Agriculture, courses are usually offered in Agronomy, Animal Husbandry, Agricultural Chemistry, Diaring, Home Economics, Horticulture and Rural Economics.

In the College of Arts, Philosophy and Science, courses are offered in nearly all of the departments in which regular work is given during the college year.

In the College of Education, regular courses are given in History and Philosophy of Education, School Organization, School Administration, Principles of Education, Psychology, and General and Special Methods of Teaching. In addition to these, special courses for superintendents, supervisors, principals, and high school teachers, are offered each year.

In the College of Engineering, many of the courses which belong in the regular freshman year of that college are offered during the Summer Session together with several advanced courses.

In the Graduate School, advanced courses, laboratories, seminars and research courses are available for those who desire to work for a higher degree. Graduate opportunities are thus available both in the usual fields of sciences and humanities, and in the professional subjects usually sought by those engaged in or seeking to qualify for the teaching profession.

In the aggregate, approximately two hundred courses are open to students in the Summer Session.

Lake Laboratory

The work at the Lake Laboratory affords the teachers and students of biology an opportunity for the special study of the biology of the lake regions, and for advanced instruction in biological subjects.

The Lake Laboratory is located at Cedar Point, Sandusky, Ohio.

University Credit for Summer Session Work

The Graduate School will recognize three Summer Sessions of eight weeks of full time graduate work as the equivalent of a year's residence, provided that the work be continued between sessions under proper supervision; otherwise four Summer Sessions will be required.

For undergraduate work, four Summer Sessions of full time collegiate work will be recognized as the equivalent of a year's residence, or two Summer Sessions as equivalent to one semester.

The special Summer Session bulletin will be sent on request.

MILITARY SCIENCE AND TACTICS

Under the law of Congress establishing the land grant colleges, it is required that instruction be given in Military Science and Tactics. Two regular army officers are detailed to take charge of this department, and the trustees have directed that all male students, except those registered in the College of Law, Medicine, Homeopathic Medicine, and Dentistry, shall render two years of cadet service unless especially excused by the Military and Gynnasium Board. Foreign students are not exempted from cadet service.

The course of instruction is both practical and theoretical. For purposes of drill, all students enrolled in the department are

organized into two regiments, composed of six battalions of three companies each, a band and a trumpet corps. Each battalion has its own staff officers. In addition to the two regiments, there are two companies of men from the students of the Three-Year Course in Agriculture. The total number of men under arms averages about seventeen hundred.

The appointment of cadet officers during the second year of service is for excellence in their work. These officers may serve during the third and fourth years of their college residence, and are given compensation at the end of each year of satisfactory service, amounting to \$25.00 for lieutenants, \$30.00 for captains, and larger sums for officers of higher rank.

Service in the band is credited as military service. Positions in the band are assigned after competitive try-outs. Members of the band who volunteer for service after having completed their two years of required duty, are paid at the rate of \$20.00 per year and receive instruction during the four winter months from a competent band-master.

PHYSICAL EDUCATION

Physical Education is conducted under the supervision of the director, who is a graduate physician and a member of the University Faculty. Regular class exercise two hours per week is required during the first year of a student's residence at the University or until he has successfully completed one year of gymnasium work. Women students are required to complete two years' work. A thorough physical examination is made of each student at the opening and close of the college year. Physical defects, abnormalities and weaknesses are noted, and judicious, healthful exercise is prescribed to fit the student's individual needs.

WORK THE UNIVERSITY DOES NOT OFFER

Inquiry is often made concerning a number of courses which the University does not offer.

The University does not have a Divinity School, nor a course for Librarians. There is no School of Music or Fine Arts.

There is no normal school work (for grade schools), preparatory work, business courses (as offered in Business Colleges), no instruction in typewriting, bookkeeping, telegraphy, stenography, elocution and oratory or in embalming.

LIBRARIES

The University Library

The University Library consists of the General Library, the Law Library, and a number of department libraries. The total number of bound volumes is 120,000.

The General Library is open on every week-day of the year, legal holidays excepted. During the academic year from Monday until Friday, the hours are from 7:30 a. m. to 10:30 p. m. and on Saturday from 7:30 a. m. to 4 p. m. During the Summer Session, the Library is open in the evening, and the hours of day opening are decided each year by special arrangement. During the Christmas holidays and the summer vacation the Library is open from 9 a. m. until 12 m.

The University Library contains some especially fine collections, among them being one of the largest and most complete collections of herd books in the country. They are shelved in connection with the Animal Husbandry department in the Judging Pavilion. The Outhwaite collection of books on the Civil War has recently been endowed, and it is already a fine collection of books treating of this period of American history. The German alcove is especially complete in both historical and literary works. The Frederick C. Clark Library of Economics has an endowment which produces a substantial annuity that greatly adds to the resources of the Department of Economics. This library is shelved in the rooms of that department in Page Hall. The Library has an unusually large collection of works on chemistry including the most important sets of periodicals and transactions of societies. This is shelved in the Chemistry Building. The Library of the Department of Chemistry is open during the regular library hours. The other department collections are open at such times as the departments determine.

The Law Library

The Law Library is in Page Hall, and consists of about 18,000 volumes. It contains all of the United States and State reports, the English reports, and a good collection of text-books. It is especially well equipped for the study of Ohio law. The Law Library is

open during the academic year, from Monday until Friday, from 7:30 a. m. to 6 p. m. and from 7 p. m. to 10:30 p. m. On Saturday it is open from 7:30 a. m. to 4 p. m. It is not open during the Summer Session or during vacation.

Archeological and Historical Society's Library

The Library of the Society, consisting of over 6,000 volumes, is situated in the new Archeology Building, at the High Street entrance to the University grounds, and is composed chiefly of complete sets of the publications of historical societies of the United States, scientific societies, publications of museums, academies, colleges, universities, and libraries, and many rare and valuable books upon the American Indian and the early history of Ohio.

This library is open to all students of the University, as a reference library, from 9 a. m. to 4 p. m.

State Libraries

The State Library numbers about 180,000 volumes and occupies a room in the State House.

The State Law Library of over 45,000 volumes, contains complete sets of the English, Scotch, Irish, Canadian, United States, and State reports, statutes, and digests. The important legal periodicals are on file.

City Libraries

The City Library numbers 80,000 volumes. The Public School Library, 85,000 volumes.

All of these libraries are accessible to the students of the University subject to the regulations governing them.

MUSEUMS

The University is the repository for a number of fine collections of historical and scientific value.

The State has placed at the High Street entrance to the University Campus, a handsome new building for the housing of its collec-

tion of archeological and historical specimens of Ohio. This is the largest collection in the State, and is of especial interest to Ohio people.

The Botanical Museum contains the University and State herbariums, a complete collection of native woods of Ohio, a collection of seeds and fruits of plants, and of native medicinal plants. There is also a general collection of vegetable products, including textile fabrics and coloring substances for illustrating economic botany.

The Ceramic Museum contains some rare specimens of pottery and several exhibits of the experimental work done by students in the Ceramics laboratory.

The Geological Museum is located in Orton Hall, and has valuable collections of fossils and geological specimens.

The Zoological Museum is located in the new Botany and Zoology Building, and has an unusually fine collection of the skins of Ohio and American birds. There are also fine collections of molluscs and insects.

The Veterinary Museum is devoted to pathological specimens used in the department work.

ADMISSION

Entrance Board Office Hours

The office of the Entrance Board is Room 100, University Hall. The office is open from 8 a. m. till 5 p. m. except Saturday. On Saturday the office hours are from 8 a. m. to 12 m.

Correspondence

All requests for bulletins, announcements, reports, and printed matter in general, as well as *all inquiries relating to entrance requirements, examinations, certificates, courses, and topics, similar to those touched on in this bulletin, should be addressed to L. E. Wolfe, Secretary of the Entrance Board. No estimate of the amount of credit toward admission or toward admission with advanced standing can be given unless official certificates are submitted describing completely all the work upon which claim for credit is based.* These certificates should be mailed before September 1st. When writing to the Secretary reference should be made to any previous correspondence. Addresses and signatures should be very carefully written, since many catalogues fail to reach the inquirer through carelessness in this detail. Bulletins are mailed as second-class matter, and on this account may be delayed as much as a week after notice of sending is received by the inquirer.

New Students

New students, as far as possible, should arrange for their admission before the University opens. Nearly all registration can be completed by mail, even to the payment of fees. By registering in the summer, a student saves himself the time and inconvenience of standing in line and waiting for an interview with the Registration Committees.

REQUIREMENTS FOR ADMISSION

Entrance Units

The statement of the quality of work required for entrance is made in terms of units. By a unit is meant a course of study covering a school year of not less than thirty-six weeks, with five periods of at least forty-five minutes each per week. A half unit is a similar course for a half year. Two hours in manual training or other laboratory work are equivalent to one hour in the classroom.

The following is a list of subjects, with their unit value, which may be offered for entrance to the University. For the definite requirements for admission to each college see pages 33 to 41:

English.....	I, 2, 3, or 4 units	
(Foreign students may substitute their native language for the English requirement.)		
American History or American History and Civil Government	I unit	
Ancient History (Greek and Roman) and Medieval History to 814 A. D.....	I unit	
Medieval and Modern History from 814 A. D. to the present (For the present, General History may be counted as a unit, but not in addition to Ancient or Medieval and Modern History.)		
English History.....	$\frac{3}{4}$ or I unit	
Algebra (through quadratics).....	I unit	
Algebra (beyond quadratics).....	$\frac{1}{2}$ unit	
Geometry (plane).....	I unit	
Geometry (solid).....	$\frac{1}{2}$ unit	
Trigonometry.....	$\frac{1}{2}$ unit	
Latin.....	I, 2, 3, or 4 units	
Greek	I, 2, or 3 units	
German	I, 2, 3, or 4 units	
French.....	I, 2, 3, or 4 units	
Spanish.....	I, 2, 3, or 4 units	
Physics	I unit	
Chemistry.....	I unit	
Physical Geography.....	$\frac{1}{2}$ or I unit	
Zoology.....	$\frac{1}{2}$ or I unit	
Botany.....	$\frac{1}{2}$ or I unit	

Physiology.....	1/2	unit
Geology.....	1/2 or 1	unit
Astronomy.....	1/2 or 1	unit
Agriculture	1/2 or 1	unit
†Farm Experience		2 units
*Commercial Subjects	} The Entrance Board may, after investigating each claim, grant a total credit of not to exceed..	4 units
*†Home Economics		
*Manual Training		
*Free-hand Drawing		

METHODS OF ADMISSION

Admission to the University may be secured by two methods:

- (1) by **examination**
- (2) by **certificate**

ADMISSION BY EXAMINATION

The Entrance Board conducts annually two examinations for admission, one in June, and the other before the opening of the session in September. All students planning to enter by examination must arrange to be present on these dates since no other opportunities for examinations are offered. It is well to take as many of the examinations as possible in June and the remainder in September. By this plan an examination in which the candidate has failed in June, can be taken again in September. There is no fee charged for the examination, and paper for the written work is supplied by the examiners. A schedule of the examinations follows. Of course, no one applicant will take all of the studies here scheduled, but each will select those which are necessary to gain admission to the course of his choice. Upon request the Secretary of the Entrance Board will mail to any address a bulletin containing a sample set of questions.

*Not accepted toward admission to the College of Law.

†Not accepted toward admission to the College of Veterinary Medicine.

†Farm Experience is accepted toward admission of male applicants to the College of Agriculture only, and must be certified on the high school certificate by the proper school authority.

Schedule of Entrance Examinations

The Entrance Board will conduct entrance examinations June 8 to 12, and September 14 to 18, 1915.

The hours for examinations are 8 a. m. and 1 p. m. Students intending to take any of the examinations scheduled in any given half day must appear within one hour of the time set for examination. Students applying for examination will first go to the office of the Entrance Board, 100 University Hall, for registration.

Tuesday	A.M.	History: Ancient and Medieval (to 814 A. D.), Medieval and Modern (after 814 A. D.), English.
Tuesday	P.M.	English Composition and Rhetoric, English Classics, Chemistry.
Wednesday	A.M.	Algebra, Physical Geography, Greek.
Wednesday	P.M.	Plane Geometry, German, Spanish.
Thursday	A.M.	Civil Government, Solid Geometry, Zoölogy.
Thursday	P.M.	Beginning Latin and Cæsar, Elements of Agri- culture, Trigonometry, Commercial Geog- raphy.
Friday	A.M.	Physics, Physiology, Botany.
Friday	P.M.	American History, French, English Literature.
Saturday	A.M.	Vergil, Cicero, Home Economics.

ADMISSION BY CERTIFICATE

Credentials which are accepted toward admission to the University become the property of the University and are kept permanently in the files.

Each applicant for admission by certificate must have been graduated from a high school that is recognized by the State Superintendent of Public Instruction as first grade, except in the case of admission to the Colleges of Agriculture and of Veterinary Medicine. He must present a satisfactory certificate to that effect. The certificate to be satisfactory must meet the following requirements:

1. **IT MUST BE OFFICIAL.** It must be made out and signed by the superintendent, principal, school clerk, or some other official of the school.

2. **IT MUST BE EXPLICIT.** For each subject or course it must show the text-books used, the amount of ground covered, the length of the course in weeks, the number of recitations per week, the length of each recitation, and the grade secured. It must also state whether or not the applicant is a graduate.

3. **IT MUST BE COMPLETE.** Many errors occur in the copying of school records. It not infrequently happens that omissions are serious enough to prevent a student's entrance, and they are almost sure to result in conditions. The applicant must remember that the Board will not credit him with anything not on his certificate, and he must see that the certificate is correct before it is sent for credits. Blank certificates will be sent on application, and applicants are requested to use these rather than their high school certificates. Diplomas need not be presented. *Certificates should be sent in at the earliest possible date. Do not wait to bring them with you when you come for registration. Attention to this request will save you much inconvenience.* No correction of any certificate will be accepted later than the beginning of the second semester of residence.

4. It should be mailed directly to the Secretary of the Entrance Board by the school official signing it.

5. It must come from an approved source as indicated below.

Classes of Certificates Accepted for Admission to a Degree Course

The following classes of certificates will be accepted *at their face value toward admission* to degree courses, and *no others will be honored except as provided for in later paragraphs*:

1. **HIGH SCHOOL CERTIFICATES:** A certificate which shows the candidate to be a *graduate* of a high school in Ohio that has been recognized by the State Superintendent of Public Instruction as of the first grade; a New York Regents' certificate; from other states, a certificate from a school which has been accredited by the North Central Association of Colleges and Secondary Schools, or a certificate from a school which has been accredited by the state university of the particular state.

An applicant presenting a certificate from a school outside the State and not a member of the North Central Association, must

supply the Entrance Board with official evidence that the school is entitled to the certificate privilege at the state university of the state in which the school is located.

2. **CERTIFICATES FROM PREPARATORY AND NORMAL SCHOOLS:** A certificate showing graduation (or the equivalent) from a preparatory or normal school of approved standing.

3. **TEACHERS' CERTIFICATES:** A certificate from the State Board of School Examiners, or a certificate granted under the provision of the General Code 7858 (1-7). A county teacher's certificate will not be accepted.

4. **CERTIFICATES FROM COLLEGE ENTRANCE EXAMINATIONS BOARD:** The College Entrance Examination Board holds examinations at various places throughout the country in June. For information address College Entrance Examination Board, Post Office Sub-Station 84, New York City.

Exceptions in Special Cases

In the College of Agriculture a certificate showing graduation from any first or second-grade high school in Ohio will be accepted at its face value toward admission to any course given by this college except to the course in Home Economics.

No high school work is required for admission to the Three-Year Course in Agriculture, but the applicant must have had at least one full year of farm experience.

The College of Veterinary Medicine does not insist on the requirements regarding graduation but the applicant must present *fifteen units* of high school work.

Entrance Conditions

It very often happens that an applicant's credentials show that he falls a little short of meeting the full entrance requirements. Such an applicant may be admitted subject to making up these deficiencies which are called *conditions*. The several colleges allow two conditions, but two conditions are not allowed in the same group except in the case of foreign languages. An engineering student over twenty-one years of age may be admitted with four units condition provided at least two of the four conditions are in foreign language.

All conditions must be removed before the student will be permitted to enter upon his second year. Conditions may be removed by passing an entrance examination in the deficient study at the times

scheduled or at a special examination held by the Entrance Board, April 17, 1915 and April 15, 1916, for the express purpose of removal of conditions. But a student who is taking or has completed a collegiate course in any subject is not eligible for entrance examinations upon the same subject unless it is a fixed requirement for admission to the college in which he is registered. The Secretaries of the colleges will assign to each student having entrance conditions outstanding at the end of the Freshman year, such college courses for the following year as may be deemed a fair equivalent for the entrance conditions.

ADMISSION WITH ADVANCED STANDING

Students entering from another college or university must present (1) *A letter of honorable dismissal*; (2) *an official and full statement of the college work already accomplished*, accompanying the same with a marked catalogue of the institution in which it was done; (3) *an official certificate satisfying the entrance requirements* of that college of the University which the student may wish to enter. The Entrance Board cannot take the fact that a student was admitted to some other college as sufficient ground for admitting him to courses here; (4) In case credits are desired in drawing, descriptive geometry, etc., plates and drawings must be submitted before the amount of credit can be determined.

ALTERNATE PLAN.—A student who has, as a regular student, received credit for a full year of collegiate work at some other college of approved standing, and who cannot produce certificates to cover entrance requirements, may offer the year's work in place of all entrance requirements, but in such a case he will receive no collegiate credits for the year's work.

All credentials must be mailed to the Secretary of the Entrance Board as early in the Summer as possible, and to insure prompt attention should not be mailed later than September, 1st.

ADMISSION FROM OTHER STATE-SUPPORTED INSTITUTIONS

The State supported institutions have entered into a cooperative plan by which the courses in the several institutions are standardized

and full credit and recognition given. This will enable students to transfer from one of these institutions to another without loss of time or credit.

ADMISSION TO SPECIAL STUDIES

To be admitted to special studies at the University, without meeting the full entrance requirements, the candidate must (1) be at least twenty-one years of age and (2) must convince both the Entrance Board and the Executive Committee of the appropriate college that he is qualified to take up the special course in question. An application for admission as a special student should be addressed to the Executive Committee of the College to which the candidate wishes to be admitted. It should state (1) the applicant's age (2) his preparation and (3) a brief outline of the course he wishes to pursue. In the case of an engineer, he must show by examination or by satisfactory certificate that he has a good working knowledge of high school algebra and of plane geometry. Any special student who shall become a candidate for a degree must satisfy the entrance requirements at least one year before a degree will be conferred.

ADMISSION AFTER THE OPENING OF THE COLLEGE YEAR

There is no regulation which prevents a student from entering the University at any time, but as a matter of fact it is almost necessary that he should enter at the beginning of the academic year. Most of the courses, especially in the first year, extend throughout the year, and one who has missed the first semester will not be able to enter upon the work of the second.

A student who enters after the beginning of a semester is expected to employ a private tutor for a time sufficient to make up all back work.

One planning to enter at any time other than the opening of the session should correspond with the Secretary of the Entrance Board to ascertain if work can be arranged satisfactorily.

It is often possible for a student who has been studying elsewhere to transfer to the University at the beginning of the second semester, since he can usually continue the work already begun. One wishing to make such a transfer should read carefully the first paragraph under **ENTRANCE WITH ADVANCED STANDING**, page 30.

REQUIREMENTS FOR ADMISSION

ADMISSION TO THE GRADUATE SCHOOL

The Graduate School is open to all graduates of four-year courses of this University, and of other universities, colleges, and scientific schools of approved standing. Full details of the requirements are published in the bulletin of the Graduate School. A student who is in any wise doubtful as to his eligibility for admission to the Graduate School, previous to his coming to Columbus, should correspond with the Entrance Board. Full details should be forwarded of the candidate's previous course of study, including a catalogue of the institution in which the undergraduate work was done.

In case the student has already taken graduate work in another institution and desires recognition of such work here, a full and official statement of the work done should be forwarded.

COLLEGE OF AGRICULTURE

Admission to Four-Year Courses

Four-year courses in Agriculture, Horticulture, Forestry, Home Economics and Entomology.

An applicant for admission must be at least sixteen years of age and must be a graduate of a high school of the first or second grade.

Distribution of Units

To obtain full standing applicants under twenty-one years of age must have credit by examination or certificate for fifteen units, of which two shall be English; two, foreign language (in Home Economics three units of English and four foreign language); two Mathematics; one, History; and one, Physics.

For admission by examination see page 27; by certificate page 28

No student under twenty-one years of age will be admitted to the college if he is conditioned in more than two units. All entrance conditions must be removed within two years after admission.

Credit for Farm Experience will be granted only to male applicants, on the following terms: for one unit, the applicant must have resided on a farm two successive years after he was twelve years of age, and such residence must be certified on the high school certificate by the proper school official.

Admission to Short Courses

No examinations will be required for the three-year courses in Agriculture or Horticulture, but the applicant must be at least seventeen years of age and, unless over twenty-one years of age, must satisfy the Entrance Board that he has had practical experience in agriculture or horticulture. This practical experience is interpreted as meaning one year of actual farm life. In addition to this the Entrance Board may require the candidate to submit a letter from the Principal or Superintendent of the school last attended, recommending him to the University.

COLLEGE OF ARTS, PHILOSOPHY AND SCIENCE

In compliance with the laws of the state of Ohio, the holder of a diploma from a first-grade high school in the state, will be admitted to the College of Arts, Philosophy and Science upon presentation of his high school certificate.

Other applicants may be admitted without examination on presentation of properly indorsed certificates from such secondary schools as have been accredited or recognized by the University, or from approved normal schools, or from the State Board of School Examiners under the following provision:

For admission by examination see page 27; by certificate see page 28.

Distribution of Units

In order to form a broad foundation for the course in Liberal Arts the following distribution of units is strongly recommended: three in English; one in History; one in Algebra and one in Geometry; one in Physics or Chemistry; four in foreign language and four at large. If

the distribution of units does not meet the above recommendation the student will be required to carry courses in the University to make up the deficiency and this may delay his graduation.

For full explanation see Bulletin of College of Arts.

No student under twenty-one years of age will be admitted on certificate if he is conditioned in more than two of the fifteen units. All entrance conditions must be removed within two years after admission.

Students over twenty-one years of age are admitted in accordance with the provisions stated under "Admission to Special Studies. See page 32.

COLLEGE OF DENTISTRY

Candidates for admission to the College of Dentistry and for the degree of Doctor of Dental Surgery must receive credit either by certificate or by examination for fifteen units, and must be a graduate of a high school of the first grade, a normal school or an accredited preparatory school.

For admission **by examination** see page 27; **by certificate** see page 28.

COLLEGE OF EDUCATION

The college is open on equal terms to both sexes. Applicants for admission must be at least sixteen years of age.

For complete entrance credit, a student must receive credit by examination or certificate for fifteen entrance units; but an applicant who passes thirteen units may be admitted with two conditions.

For admission **by examination** see page 27; **by certificate** see page 28.

Distribution of Units

As a basis for the most advantageous arrangement of a college course, applicants are advised to present the following units for admission: three in English, one in history, two in mathematics, one in physics or chemistry, four in foreign language and four as choice

may direct. If this work is not presented for entrance, the student's progress may be retarded as he will be required to carry courses in the University to make up the deficiency and he may not be able to obtain a degree in the usual four years. For full explanation see Bulletin of College of Education.

COLLEGE OF ENGINEERING

The college is open on equal terms to both sexes. Applicants for admission must be at least seventeen years of age.

To obtain full standing in the College of Engineering, applicants under twenty-one years of age must have credit by examination or certificate for fifteen units.

For admission **by examination** see page 27; **by certificate** see page 28.

Distribution of Units

Of these fifteen units, not less than three shall be in English; three in mathematics (including solid geometry); one in physics; four in languages (other than English); and four shall be elective, and may include any subject given by any first-grade high school.

Admission to Short Courses

Applicants must be at least seventeen years of age and unless they are over twenty-one years of age, must pass examinations in arithmetic and geography and must be able to write a business letter or a short theme, correct in grammar and orthography; or they must present satisfactory certificates showing that they have successfully pursued these subjects elsewhere. In addition, each applicant under twenty-one years of age must present a letter or certificate showing that he has at least two years' consecutive practical experience in some industry related to the course which he wishes to pursue, and this certificate must be satisfactory to the Executive Committee of the College of Engineering.

Applicants over twenty-one years of age are admitted without examination, but must present a letter or certificate covering practical experience, as provided in the case of those under twenty-one years of age.

COLLEGE OF HOMEOPATHIC MEDICINE

This college is open on equal terms to both sexes. Applicants for admission must be at least sixteen years of age, and must present to the Entrance Board two official certificates:

1. An Ohio Medical Student's Certificate, which has been secured from the Ohio State Medical Board.

2. A certificate of high school and college work. The high school certificate should show that the student is a graduate of a high school of the first grade, and the certificate should cover fifteen units for entrance. The college certificate should show that the student has had one year (thirty semester hours) of preparation in either the College of Arts, Philosophy and Science of the Ohio State University or an institution of acceptable rank. This certificate should include the following subjects: Chemistry (general and qualitative), Biology, Physics, English, French or German.

Note—If Physics has been taken in the high school, this requirement is waived.

On and after September 1916, the requirement for admission to the College of Homeopathic Medicine will be increased to **two years** or sixty hours of college work.

COLLEGE OF LAW

On and after the opening of the college year in September 1915, the requirements for admission to the College of Law shall be as follows:

Candidates for a Degree

Graduates of approved universities or colleges, and students who in addition to their entrance requirements have completed a course of study equivalent to that required in the first two years of the course

leading to a degree in the College of Arts, Philosophy and Science of the Ohio State University, will be admitted to the College of Law as candidates for the degree of LL. B.

Candidates for a Certificate

Candidates for a certificate must meet the same requirements as candidates for a degree except that work equivalent to one year instead of two years in the College of Arts, Philosophy and Science is required. No deficiency will be allowed.

Announcement is also made of the intent to abolish in a few years the certificate and to require all students other than special students to meet the requirements now made for candidates for the degree of LL. B.

Special Students

Persons twenty-one years of age or over, who are unable to meet the requirements for admission as regular students may be admitted as special students, not candidates for a degree or a certificate, upon presenting satisfactory evidence of their ability to pursue with profit, the study of Law. Such students are admitted by a vote of the Executive Committee and are held to the same degree of thoroughness in their work as are the regular students.

COLLEGE OF MEDICINE

Candidates for admission must present to the Entrance Board, two official certificates:

(1) An Ohio Medical Student's Certificate issued by the Ohio State Medical Board. Regulations for securing this certificate may be obtained by writing to the Entrance Examiner of the Ohio State Medical Board, State House, Columbus, Ohio.

(2) A certificate of high school and college work showing the subject-credits in high school and the amount of college work completed.

Two years of college work in the Ohio State University or in any other accredited college or the equivalent as determined and accepted

by the Entrance Board, is required for admission to the College of Medicine.

All candidates for admission must show by examination or by acceptable credentials that they possess such knowledge of Inorganic Chemistry, Physics, Biology and Language as may be obtained by satisfactory completion of the following courses:

(1) Chemistry—The equivalent of at least one year of collegiate work of a value not less than eight semester hours, of which at least four semester hours shall be laboratory work, and the total instruction shall be not less than 192 hours.

(2) Physics—The equivalent of at least one year of collegiate work of a value not less than eight semester hours, of which at least four semester hours shall be laboratory, and the total instruction shall be not less than 192 hours.

(If one year of high school Physics has been presented for college entrance; then one half of the above college Physics will fulfil the requirement.)

(3) Biology—Zoology or Botany or General Physiology: The equivalent of at least one year of collegiate work of a value of not less than eight semester hours, of which at least four shall be laboratory work, and the total instruction shall be not less than 192 hours.

(4) A Foreign Language, German or French preferred: A total of not less than nine semester hours, all in one of these subjects. One unit of high school work may be counted as three semester hours of this requirement, but at least six semester hours shall be collegiate work.

Conditional Entrance

Candidates who lack a part of the full requirements for admission to the College of Medicine may be received conditionally for the first year's work.

The total amount of conditions must not exceed eight semester hours work nor be more than four hours in any one of the groups 2 or 4, noted above: i. e., Physics or Language.

The work represented by these conditions must be completed and examinations passed before the opening of the second year. No student may continue as a member of the second year class who has not fulfilled all subject entrance requirements.

No condition can be allowed in either Chemistry or Biology.

COLLEGE OF PHARMACY

The college is open on equal terms to both sexes. Applicants for admission must be at least sixteen years of age.

Requirements of the Ohio Board of Pharmacy

On October 13, 1914, the Ohio Board of Pharmacy fixed the minimum requirements for admission to Schools and Colleges of Pharmacy by resolution, as follows:

Resolved, That on and after July 1, 1905, no school or college of pharmacy shall be recognized as in good standing by the Ohio Board of Pharmacy which does not require of all applicants, as a minimum condition of admission, a common school education, or the equivalent thereof, which shall include one year in a high school of the first grade (Ohio), or an academy legally constituted, providing a course of study of not less than four years.

Later, in explanation of the above resolution, the following statement was issued: In order to dispel any doubt as to the meaning of the term "equivalent to one year in a high school of first grade (Ohio)," used in the resolutions of October 13, 1904, the Board hereby specifies a minimum equivalent as embracing one year of instruction in each of the following branches: Algebra, English, Natural Science, and History (United States or General).

Any School of Pharmacy may admit to a course in pharmacy an applicant who has received instruction in the branches herein named in a high school, academy, or other educational institution, for a period of one year.

By order of the Board of Pharmacy.

W. R. OGIER, *Secretary*

COLUMBUS, OHIO, April 1st, 1905.

Admission to the Course Leading to a Degree

To obtain full standing, applicants under twenty-one years of age must have credit by examination or certificate for fifteen units, of which two shall be in English; one in history; two in mathematics; one in science, and two in foreign language.

For admission by examination see page 27; by certificate see page 28.

Admission to the Course Leading to a Certificate

In order to conform to the requirements of the Board, applicants for admission to the Short Course must present certificates showing instruction in the following:

English, one year

Algebra, one year

History (United States or General), one year

Natural Science, one year

The requirements in Natural Science may be met by credits in any of the following subjects, or by a combination of them: Physical Geography, Physics, Physiology, Chemistry, Botany.

Applicants, who are slightly deficient in these requirements will be given until the end of the first year to remove their deficiency.

Special Short Course Students

Students who have completed the work for the first year of the Short Course, and who wish to pursue certain of the studies of the Four Year Course will be permitted to do so provided they are able to convince the Executive Committee and the Entrance Board of their ability to carry the work desired. Such students are classified as special students in the Short Course.

COLLEGE OF VETERINARY MEDICINE

Applicants for admission must be at least seventeen years of age. To obtain admission without condition, applicants under twenty-one years of age must have credit by examination or certificate, for fifteen units from a high school.

For admission by examination see page 27; by certificate see page 28.

SUMMER SESSION

The requirements for admission to work in the Summer Session in any college, or the Graduate School, are the same as during the regular college year. (See requirements for admission under each of the colleges and Graduate School.)

UNITS RECOMMENDED BY THE SEVERAL COLLEGES FOR ADMISSION

The table shows the distribution of units strongly recommended for admission to the several colleges. The University will accept for admission any 15 units from a first grade high school. If the distribution of units does not correspond to that recommended by the college a student enters, he will be required to carry courses in college to make up the deficiency and this may delay his graduation.

College	Age	English	History	Mathematics	Science	Foreign Language	Extra	Total	Conditions Allowed	High School	Graduation	College Work
Agriculture (except)

*For collegiate requirements see Bulletin of College of Medicine.

GENERAL REGULATIONS

Registration

All students are required to register on the first day of each semester. All term bills, laboratory deposits, and fees required from students must be paid previous to and as a condition of registration.

Students are cautioned against trying to register without the necessary money for fees.

Admission to Class

Heads of Departments shall not permit students to enter classes in their respective departments unless notified by the Registrar.

Class rolls shall be made up from enrollment cards issued by the Registrar, and no one shall be recognized as a member of any class until his enrollment card has been received.

Class Work

Regular University classes shall have precedence over any special examination or exercise not provided for on the program or by regular Faculty action.

Prescribed Order of Studies

All students except special students shall be required, where possible, to follow the prescribed order of studies in their courses, and in case of temporary irregularity shall be required to make their course regular as speedily as possible in the manner prescribed by the appropriate Executive Committee.

Amount of Work

No student shall be permitted to carry less than fifteen or more than eighteen hours per week of classroom work or its equivalent without the consent of the proper Executive Committee; and no student conditioned in any study will be permitted to carry more than the regular work of his class during the following semester; and when the amount of such work is not otherwise determined it shall be construed to mean fifteen hours a week. Where the privilege of carrying

more than eighteen hours of work has been granted to any student, no favors shall be shown him in any of his classes on that account.

Each student will be held responsible for the performance of all work assigned him on his class card.

Change of Studies

Every student is held responsible for the subjects on his class card. No study may be dropped or changed except by favorable action upon a formal request presented by the student to the appropriate committee of the college in which he is enrolled.

A Student's Local Address

Each student shall at the beginning of the year give in writing his or her local address to the Registrar, and shall promptly report all subsequent changes of address.

Withdrawal from the University

Students who wish to withdraw from the University must make application to the Dean of the appropriate college for permission to withdraw in good standing. In order to retain their right to voluntary return, the reasons given for withdrawal must be satisfactory to the Dean, and must be so indorsed at the time the application is filed. If the permission to withdraw is withheld, and students absent themselves from the University notwithstanding, they will sacrifice their right to voluntary return, and can only obtain re-admission by petition to the Executive Committee of the appropriate college, as in the case of those who have lost their standing by reason of conditions and failures.

Whenever any student, by withdrawal, either voluntary or on account of disciplinary reasons, ceases to be a member of the University, it shall be the duty of the President to notify his parents or guardian of the fact.

Excuses for Absence

All absences of individual students must be accounted for to the head of the department under which the absence occurs and in all possible cases permission must be obtained previously.

Whenever a student is absent from a class during four consecutive recitations, it shall be the duty of the instructor to report that fact to the Registrar's office without delay.

Excuses will not be granted for absence of more than two weeks' standing unless the absence has been continuous.

Delinquencies

Delinquencies on the part of the students, such as tardiness, absence, deficiencies, or offenses against good order, in the several departments of instruction, shall be dealt with by the heads of the departments in which they occur. Flagrant and incorrigible cases shall be reported to the President.

Living Arrangements

The President shall have authority to supervise the living arrangements of students not residents of the City of Columbus, and to order the immediate withdrawal of any student from any boarding or lodging house in which he deems the surroundings are undesirable.

Use of Tobacco Prohibited

The use of tobacco in any form in the lecture rooms, halls, corridors, doorways, stairways, laboratories, and libraries of the University is prohibited.

Representing the University

No student or body of students of this institution shall be permitted to take part in any public theatrical performance not under the auspices of the University while wearing the uniform or bearing the arms or accouterments of the University Regiment, or in any other manner publicly identifying themselves as students or representatives of the University, except with the express permission of the Faculty or of the Faculty Committee on Amusements and Recreation, previously obtained.

Examinations and Standing

The standing of undergraduate students in each study shall be reported at the end of each semester as M—merit or superior, G—good or high pass, A—average pass, P—pass, C—condition, F—failed, D—deferred or incomplete.

The standing M, G, A, or P, indicates that the student has full credit for the semester's work in the study in which this standing is obtained.

The standing D—deferred, means that the work of the student is qualitatively satisfactory in the study in which this standing is obtained, but that a remnant remains incomplete for reasons beyond the control of the student.

A final written examination shall be held for all undergraduate students in all courses, except purely laboratory and seminar courses, in which a final examination shall be optional with the head of the department.

The report "credit" (K) shall be used only for work not done in regular class at the University.

The standing "condition" indicates that full credit has not been earned. The condition may be removed by one or more of the following methods at the discretion of the instructor: (a) by satisfactorily completing the work in which the student is conditioned; (b) by passing a re-examination; (c) by doing sufficiently good work in the following semester, if the work is continuous; but if the work of the second semester is not passed, both semesters shall be reported as "failed."

It shall be the duty of a conditioned student to ascertain from his instructor in the first week of the following semester what procedure he must follow in order to remove the condition.

One regular opportunity in the semester following the incurring of the condition for the removal by re-examination will be given in accordance with a schedule to be published by the Schedule Committee.

Each student expecting to take such re-examination shall give notice to the examiner at least one week in advance of the schedule time.

A condition that is not removed within one year from the beginning of the semester in which it is incurred, or on the first re-examination, shall lapse into a failure which can be removed only by repeating the work in class.

The standing "failed" indicates that the student has obtained no credit whatever for the semester's work in which the mark is given. The student must, at the first opportunity, repeat in class the study in which he has failed. But a student who has failed in an elective study may be excused from repeating such study by the Executive Committee of his college. In case of failure in any continuous study the work of the semester in which the failure is incurred must be repeated in class before any subsequent semester's work in that study can be commenced. Unexcused absence from any regular examination is construed as failure therein.

Any student who fails at the end of any semester to secure full credit for two-thirds of his work shall be put on probation for the succeeding semester of his residence at the University with restricted work, to be determined by the executive committee in each college. The executive committee of a college may put a student on probation, at any time, and if during the time of probation, he shall incur failures amounting in any semester to more than one-third of his work or conditions and failures amounting to one-half of his work, or conditions alone amounting to two-thirds of his work, he shall thereby cease to be a member of the University and shall be so notified by the Dean of the college in which he is registered and a notice shall be sent to the parent or guardian of the student.

If, for any cause, the preparation, progress, or success of any student in the work assigned him be found unsatisfactory, the President may remove him from a class or dismiss him from the University.

Students repeating a study in which they have obtained credit shall be subject to examination in it the same as if they had not previously obtained credit.

Residence Requirements

No undergraduate will be admitted to candidacy for a degree at any commencement who has not done the last year of work required for the degree in residence at that college of this University in which the degree is sought. Two summer sessions are considered the equivalent of one semester, and four summer sessions the equivalent of the year. Students who will be candidates for degrees at commencement time must be registered in such candidacy not later than the first day of October of the academic year in which the degree is to be conferred.

FEES AND EXPENSES

General Charges

All University dues must be paid at the opening of each semester as a condition of admission to classes. Registration is not complete until the fees have been paid. Students are cautioned against trying to register without the necessary money for fees and required deposits. No student has any privileges in the classes or laboratories until all fees and deposits are paid.

INCIDENTAL FEE—The fee for all students is fifteen dollars a semester.

For those students enrolled in the three-year courses, in the College of Agriculture, the fee is ten dollars per term or twenty dollars per year.

The fees for the professional colleges are as follows:

College of Law	\$30 00 each semester
College of Medicine.....	75 00 each semester
College of Dentistry.....	75 00 each semester
College of Homeopathic Medicine.....	62 50 each semester

Additional Fee for Late Registration

Former students who do not pay their registration fees until the third day of the first semester, and the second day of the second semester, must pay one dollar additional. For each day of delinquency thereafter, fifty cents is added.

OTHER EXPENSES

The Ohio Union

A fee of one dollar a semester is paid by all male students at registration. This entitles the student to all privileges of the Union consistent with the Constitution and House Rules governing it.

Locker Fee

The gymnasium is free to all students, but those desiring to use a locker are charged a fee of two dollars a semester, which includes the rental of towels.

Laboratory Deposit

Students are required to pay for all materials consumed in laboratory work. To meet the cost of these materials a deposit ranging from two to ten dollars for each course requiring such supplies is made at the Bursar's office before the student can enter the laboratory. All laboratory supplies are sold at the Laboratory Supply Store, Chemistry Hall, to students at cost to the University, and charged against the deposits. Any unused part of the deposit is refunded at the end of the semester.

Students should present their class cards to the Bursar when they pay laboratory deposits.

Instructors shall not permit students to engage in laboratory work unless first shown a receipt from the Bursar for deposits paid.

Filing of Election-Cards

Election-cards of students in the Colleges of Agriculture, Arts and Education who were in residence the previous year, that are not filed before **September 1st**, will be accepted **only upon payment of \$1.00**

Changes at the request of the student, **will not be made** in these cards **after September 1st**, except on the payment of **\$1.00** for each change.

These fees in exceptional cases, may be remitted by the executive committee of the college.

Fee for Special Examinations

Any examination desired at a time other than that specified in the official schedule can only be taken after the payment of fee of \$2.00 to the Secretary of the University.

Fee for Special Re-examination

With the permission of the instructor, conditions may be removed at a time other than regularly scheduled re-examinations. In case a re-examination is given at any other than the scheduled time a special fee of \$2 00 must be paid to the Secretary of the University before such re-examination is given.

Return of Fees

Fees are not returnable except in case of sickness and causes entirely beyond the control of the student. No portion of the fees shall be returned for voluntary withdrawal of the student or enforced withdrawal thirty days after registration. Students withdrawing under discipline forfeit all rights to the return of any portion of the fees. In no case shall more than one-half the fee be refunded.

Graduation Fee

A fee of five dollars, to cover expense of graduation and diploma, is required of each person receiving one of the bachelor degrees from the University, and this fee must be paid on or before the last Friday before Commencement. A like fee of ten dollars is charged each person receiving one of the higher graduate degrees.

Fees of Graduate Students, Scholars and Assistants

Graduate students, with the exception of Graduate Assistants, and Scholars are subject to the same requirements relatives to fees as undergraduates. Graduate Assistants, and Scholars are not required to pay the incidental fee or the laboratory fees. Assistants, whether graduate or undergraduate students, are required to pay both the incidental and the laboratory fees.

Cadet Uniform

The uniform with which the members of the regiment are required to provide themselves costs, (without overcoat), about twelve dollars. It is quiet in pattern, and may be worn in place of civilian dress. New students are advised against buying second-hand uniforms unless they have been previously inspected and approved by the Commandant. Inspection has shown in many cases that second-hand uniforms were unfit to wear and certainly not worth the price asked for them. All such uniforms are subject to rejection by the Commandant. Students should not arrange for uniforms until so directed by the military authorities.

Cost of a Year's Work

One of the most perplexing questions that confronts a prospective student is what the course is going to cost him a year.

The total cost of a year's work will depend considerably upon the course pursued. In some courses, such as chemistry, considerable material is used by the student, and this must be paid for by him. Engineering students must have a set of drawing instruments, which costs about \$20.00. The cost of books is an item which varies greatly with the course. In general, it may be said that the legitimate cost per year ranges from \$375 to \$400 exclusive of traveling expenses.

In order to furnish more specific information, we have listed below an estimate of the average payments required by the University for the freshman year of the various Colleges and have estimated the cost for room and boarding at a safe price. These two items are sometimes reduced slightly where two students occupy the same room and where boarding clubs are economically managed. Fees to the University are paid one-half at the beginning of each semester.

Colleges Other than Professional Colleges

Incidental fee.....	\$ 30 00
Ohio Union.....	2 00
Gymnasium locker	4 00
Deposits to cover laboratory materials and breakage.....	20 00
Uniform.....	12 00
Books	20 00
Board—(36 weeks at \$3.50 per week).....	126 00
Room rent, at \$8.00 per month.....	72 00
General expenses.....	100 00
Total.....	<hr/> \$386 00

The item of *general expenses* in the above estimate is always subject to the personal habits of the individual, and varies according to the degree of economy exercised.

Note—In order to meet all the necessary expenses of registration, books, uniform, and other expenditures incident to securing a room and board, a student should come prepared to expend from sixty-five to seventy-five dollars during the first ten days of a semester. After that period, his board and room rent will constitute the major part of his expenses.

Graduate Assistantships

To encourage graduates of this University, and other approved institutions of learning, to continue their studies and to undertake

advanced work leading to the higher degrees, the University has established Assistantships in several departments. These demand about one-half of the time of the student for laboratory or other assistance—as far as possible along the line of his graduate study. The remainder of his time is given to graduate work. The assistantships pay from \$150 to \$300 for the academic year, in addition to the regular incidental and laboratory fees.

The Robinson Fellowship in Engineering

This fellowship, endowed by the late Professor Stillman W. Robinson for the encouragement of graduate research work in engineering, provides five hundred dollars annually and is open to graduates in Mechanical, Civil, and Electrical Engineering. Any student to whom this fellowship is awarded must devote his entire time to the work, which shall amount to at least sixteen hours per week, of which at least eight shall be in the line of original research or investigation. This fellowship will be awarded on the Friday preceding Commencement Day. All applications must be filed with the committee on or before the first of June of the same year, and must include a general outline of the course of study and research proposed. This must show a definite object to be attained. The application may be for one or two years, preference being given to candidates electing the two-year course.

Free Scholarships

Two types of free scholarships are offered in the College of Agriculture:

(1) Scholarships good for the three-year courses in Agriculture and Horticulture.

(2) Scholarships good for four-year courses in the College of Agriculture.

Short Course Scholarships

Three of these scholarships are assigned to each county in the state. Each scholarship is good for three years, and one becomes available each year.

These scholarships are awarded under rules and regulations of the State Agriculture Commission, as prizes in the Junior Contest work conducted by the commission.

Four-Year Scholarships

Twenty of these scholarships are assigned to each of the four districts into which the state is divided by the State Superintendent of Public Instruction for the purpose of supervising agriculture instruction given in the public schools.

Each scholarship is good for four years, and five of them become available in each district each year.

These scholarships are awarded to graduates of first and second grade high schools, through a competitive examination in high school agriculture that is held under the supervision of the State Supervisors of Agricultural Education.

Value of Scholarships

The scholarships cover the University fixed fee. In the short courses a student saves \$20 per year, and in the four-year courses, \$30 per year.

For further information concerning these scholarships address the Dean of the College of Agriculture, The Ohio State University, Columbus, Ohio.

Student Aid

Through the munificence of Hon. R. P. Scott, of Cadiz, and the late J. McLain Smith, a certain sum is available each year for the assistance of worthy students. Students who have proved their ability to maintain a high order of scholarship and who are of high character and worth are given the preference in the award.

Self-Support

There is a large amount of work upon the University farm which is assigned to students, preference being given to those who are studying Agriculture. *But the University cannot promise work to all applicants.* Many students find work in private families, in offices, and in various occupations, by means of which they defray a portion of their expenses. A person of ability and energy who is master of a trade, or who can do good work of any kind, can generally find employment, but prospective students are cautioned against depending wholly upon such uncertain sources of income.

Students should distinctly understand that where they attempt entire or partial self-support they should lengthen the term of study.

An employment bureau is maintained at the University Y. M. C. A. in Ohio Union, where the names of those seeking work and of those desiring workers are recorded. Students should report to the Executive Office from time to time as to their needs and their work. This will enable the authorities to be more helpful than would be possible otherwise. Very much depends, however, on the individual's power of initiative. Students should not come to the University expecting others to find places for them.

Self-support does not excuse students from cadet service.

LIVING ARRANGEMENTS

Rooms and Board

The University possesses no dormitory faculties for men.

Boarding clubs are formed in the neighborhood of the University. Furnished rooms accommodating two students, can be obtained at one dollar to a dollar and a half for each student, and the cost of the table board in the clubs and restaurants near the University is three dollars and twenty-five cents, to four dollars a week. Board for men can be secured at the Ohio Union at reasonable rates.

Board with furnished rooms can be obtained in private families within convenient distance from the University at rates varying around six dollars a week.

Church Homes

Several denominations have established church homes near the University.

The Presbyterian Home for Men is located on 10th Avenue, and the Newman Club for Catholic Men is located on Indianola Avenue.

WOMEN STUDENTS

The Ohio State University is open to women students upon the same conditions and by the same methods of registration offered to men students. Within twenty-four hours after formal registration, every young woman must also register with the Dean of Women at her office in Orton Hall.

Living Arrangements

It is recommended that women students arrange for a regular boarding place and be dependent neither upon the restaurants in the vicinity nor upon the cooking of their own meals. A list of approved houses for women with some indication of the character and price of

the rooms may be obtained from the Dean of Women after July first, additional addresses to be had in September upon application. This is a list of houses where only women are taken as roomers and where a parlor is available for callers. As renting by mail is not satisfactory, the University would advise either a preliminary visit to the city for that purpose or arrival a day or two before registration. There should always be a definite understanding with the householder as to rates, times of payment, vacation charges, the period for which the room is engaged, and the privileges and rules of the house. Whenever a room not on the approved list is desired, or whenever removal is contemplated, the Dean of Women should be communicated with and her approval be obtained before engaging rooms.

Self-Support

Women students sometimes maintain themselves in college by securing room and board in exchange for service in the home. Students desiring such employment and persons desiring student-help may register with the Dean of Women who will advise all students who desire employment. It must be recognized, however, that this is an unsatisfactory method and leaves the student little time for academic work. During the college year the Dean of Women holds office hours every week day excepting Saturday, in Orton Hall. At such times she welcomes any woman student who cares to come to her, whether for advice, information, or an informal talk.

Dormitories

Oxley Hall, the hall of residence for women, accommodates sixty-three students. The Hall contains suites, single and double-rooms, with a students' sitting-room, dining-room, parlor, sun parlor, and laundry, this latter for the use of the students two days a week. The Hall is governed by Student Government with the advice and supervision of the House Superintendent. For particulars, including rates, address House Superintendent, Oxley Hall, Columbus, Ohio.

St. Hilda's Hall has been provided for the women students of the Episcopal Church under the government of the Bishops of Ohio with a local House Committee, consisting of church women identified with the University. For information, address Superintendent of St. Hilda's Hall, 1590 Neil Avenue, Columbus, Ohio.

The Health of the Students

It is the purpose of the University to safeguard and promote the health of its students in every reasonable way. The Director of Physical Education for women holds regular office hours for consultation and advice, and the Homoeopathic College holds a clinic for women from one to three o'clock on Monday and Thursday. Lectures on the conservation and promotion of health are given to all Freshmen and exercises for its maintenance and development are offered in the gymnasium. All students are required to take a physical examination in the Fall and must report during the first two years to the Physical Director.

STUDENT INTERESTS AND ACTIVITIES

OHIO UNION

The Ohio Union is the social center for men on the University Campus. Its aim is to offer an opportunity for close comradeship among Ohio State men. It affords a college home for every student where he may bring his parents and friends, and where he may find a comfortable place in which to spend his leisure hours. It has been a strong element in building up a spirit of loyalty and devotion to the University. It is the center of all student interests and activities, and forms a meeting-place on the campus for all men's organizations.

This building, with its furnishings cost \$95,000. The main floor contains the office, a spacious lobby, and a writing room. On this floor is a students' post-office, visitors' room, check room, and recreation hall. The basement contains a barber shop, a private dining room, and a large dining room which will seat at least four hundred persons.

On the second floor are the offices of the Alumni Association, Y. M. C. A. and University Pastors rooms, committee rooms, the offices of the Student Publications and a large trophy hall which occupies the central portion of this floor. On the third floor is the auditorium.

The Ohio Union is under the direct control of a Board of Overseers, composed of one trustee member, appointed by the Board of Trustees, one faculty member appointed by the President, one alumni member elected by the Alumni, and four student members elected by popular vote of the student body. This Board has in charge the care and management of the building.

RELIGIOUS ORGANIZATIONS

The Young Men's Christian Association

The religious organizations of the University occupy a prominent place in University life. The Young Men's Christian Association has a membership of over five hundred men, and is affiliated with the

World's Student Christian Federation. Regular meetings are held on Thursday evenings, and there are also frequent meetings for the promotion of good fellowship and social intercourse. Systematic courses in Bible study are offered. The office of the Young Men's Christian Association is located in Ohio Union.

At the opening of the college year, the Association aids the new students in obtaining desirable rooms and boarding places. The Association renders this service to the University in return for the financial aid that it receives from the University Trustees. It also maintains an employment bureau, through which students may be able to find work to enable them to partially maintain themselves in the University.

The Young Women's Christian Association endeavors to satisfy the moral and spiritual needs of women students. It keeps in touch with the National Association work by sending delegates to the yearly conference. Weekly meetings are held at the Women's Union on Tuesday noon at 12:30, and regular Bible and mission-study classes have been formed.

The Newman Clubs of the University are formed for the benefit of the Roman Catholic men and women in the University.

The Menorah Society gathers into an organization students of the Jewish faith.

University Pastors

The Presbyterian, Methodist and Baptist Churches have stationed pastors at the University to serve the students of their respective churches and others who may desire it. Parents and prospective students are invited to write to them at any time. Local pastors of other denominations also take a sympathetic interest in those who attend their churches.

STUDENT ACTIVITIES

Eligibility

Under the rules of the University Faculty, the officers of all student organizations must meet the requirements of the Western Conference eligibility rules for students participating in intercollegiate athletics.

The members as well as the officers of the following organizations must meet these eligibility rules: all members of student councils, dramatic clubs, glee clubs, musical organizations, staffs of publications, managers of athletic teams, class officers and cheer leaders. The officers of all student organizations must meet the eligibility rules.

In brief these rules are as follows: the candidate must have been in residence at this University for one academic year; must meet the entrance requirements (15 units) for the College of Liberal Arts; must be registered in the University and carrying full work, at least fifteen hours; must have credit on the University records for thirty semester hours and must not have any unremoved conditions or failures standing against him.

Student Council

The **Student Council** is the representative organization of the students of the University. It has under its control all class elections, contests, customs and privileges. It is composed of representatives from the classes as follows: six seniors, five juniors, four sophomores and three freshman, who are elected by popular vote by the classes which they represent.

Women's Council

The **Women's Council** takes special supervision of the various activities of the women in the University. It is composed of four seniors, four juniors, four sophomores and three freshmen.

HONORARY ORGANIZATIONS

Sigma Xi—The Omega Chapter of the honorary scientific society of Sigma Xi was established at this University in 1898. Students who show marked ability in scholarship and research are elected to membership.

Phi Beta Kappa—The chapter, Epsilon of Ohio, of the honorary society of Phi Beta Kappa was established at this University in 1904. A small number of seniors and juniors in the College of Arts, Philosophy and Science are elected each year to membership. The election is based upon high scholarship.

Eta Kappa Nu—Gamma Chapter of Eta Kappa Nu was established at this University in 1907. This is an honorary society for electrical engineers.

Gamma Phi—A chapter of Gamma Phi was established at this University in 1902. This is an honorary organization for students who have been prominent members of athletic teams.

The Sphinx—This honorary senior society was established at the University in 1907. Its membership is confined to seniors who have been leaders in student organizations and activities. It is self-perpetuating, and its members are chosen on Link Day, which is held in May each year.

Bucket and Dipper—This honorary junior society was founded in this University in 1907. Its members are chosen each spring from men who have been prominently identified with college activities.

Delta Sigma Rho—The Ohio State University Chapter of Delta Sigma Rho is composed of men who have participated in intercollegiate debate.

Phi Lambda Upsilon—The Eta Chapter of this honorary chemical society was established at this University in 1911.

Sigma Delta Chi—Honorary Journalistic Society for men.

Theta Sigma Phi—Honorary Journalistic Society for women.

ATHLETICS

The University has a department of Competitive and Recreative Athletics which is under the direct control of the Athletic Board. This Board consists of nine members: five faculty members, appointed annually by the President of the University; two alumni members, elected annually by the Alumni; and two student members, elected annually by the members of the Athletic Association.

The immediate direction of intercollegiate and intramural Athletics is in the hands of a Director of Athletics who is responsible to the board of control. He arranges all schedules of games, supervises all trips of athletic teams and promotes a general participation in all forms of outdoor athletics among students of the University.

Associated with the Director in charge of the department, are the Director of Foot-Ball and the Director of Track Athletics. Each of these Directors has the rank of professor and is a member of the University Faculty.

The various fields of athletic interest are developed and encouraged. Intercollegiate teams are maintained in foot-ball, base-ball, basket-ball, track athletics, soccer and tennis.

Through a system of intramural athletics, contests are held between leagues organized in the various departments of the University, and all students have an opportunity to participate in athletics under competent supervision.

The Ohio State University is a member of the Western Athletic Conference, which is composed of the following institutions: Chicago, Indiana, Illinois, Iowa, Minnesota, Northwestern, Ohio State, Purdue, and Wisconsin.

The Western Conference eligibility rules govern the participation of students in all intercollegiate games. In brief the rules are as follows: The candidate must have been in residence at this University for one academic year; must meet the entrance requirements (15 units) for the College of Liberal Arts; must be registered in the University and carrying full work, at least fifteen hours; must have credit on the University records for thirty semester hours and must not have any unremoved conditions or failures against him. These rules are strictly adhered to and every athletic team that represents the University must be officially certified by the University Registrar.

PUBLICATIONS

The Ohio State University Monthly is published in the interests of the Alumni and former students of the University.

The Ohio State Lantern is a daily University newspaper, and is published six times a week during the college year. The Lantern is under the immediate direction of the Department of Journalism, and its staff is composed of students in the classes in Journalism.

The Agricultural Student is published monthly by students in the College of Agriculture.

The Makio is the college annual, and is published by the Junior Class in the month of May.

The Sun-Dial is published monthly by the members of La Boheme Literary Society, and is partially serious and partially humorous in its contents.

The Veterinary Alumni Quarterly is published during the calendar year by the Alumni Association of the College of Veterinary Medicine. It is a technical publication in the interests of Veterinary Medicine.

STUDENT ORGANIZATIONS

The University has a large number of organizations, covering every field of student interest and activity.

The literary societies are the Athenean, La Boheme, Jeffersonian, Philomathean, Veterinary Medical and Townshend.

Debating League

The University is a member of the Tri-State Debating League which was organized in 1905, and includes the University of Illinois, University of Indiana and the Ohio State University. A public debate is held each year. The debaters are chosen by competitive tests, and any student in the University is eligible to compete.

Scientific and Technical Societies

There are numerous scientific and technical societies which include in their membership both students and faculty members. Among these are the Student Branches of the American Institute of Electrical Engineers, of the American Institute of Mechanical Engineers, and of the American Institute of Mining Engineers; the Archaeological Club, the Architectural Club, the Biological club, the Ceramic Society, the Chemical Society, the Civil Engineers' Club, the Home Economics Club, the Forestry Society, the History Club, the Horticultural Society, the Pharmaceutical Society, the Philosophy Club, the Physical Club, the Political Science Club, the Psychological Club, the Commercial Club, and the Saddle and Sirlion Club.

Dramatic Organizations

The Dramatic Organizations of the University are four in number: Browning, the Strollers, Deutscher Verein. and Le Cercle Dramatique. Places in the various plays are secured by competitive try-outs, which are held early in the college year.

Musical Organizations

The Musical Clubs of the University are three in number—the **Men's Glee Club**, the **Girls' Glee Club**, and the **Agriculture Glee Club**. Membership in these clubs is secured by competitive try-outs.

The Choral Society is composed of two hundred voices. It meets each week for practice under the direction of a competent instructor, and presents an oratorio during Commencement Week.

The University Band is an organization of sixty-four musicians. It belongs to the Military Department of the University, and is under the direction of an efficient instructor.

Greek Letter Societies

The following Greek letter societies have chapters in this University: Phi Gamma Delta, Phi Kappa Psi, Sigma Chi, Phi Delta Theta, Chi Phi, Beta Theta Pi, Sigma Nu, Alpha Tau Omega, Sigma Alpha Epsilon, Phi Delta Phi, Delta Tau Delta, Kappa Sigma, Alpha Zeta, Delta Chi, Delta Upsilon, Alpha Gamma Rho, Acacia, Alpha Psi, Delta Theta Sigma, Sigma Phi Epsilon, Phi Delta Chi, Alpha Sigma Phi, Sigma Pi, Alpha Pi Upsilon, Alpha Chi Sigma, Triangle, Zeta Beta Tau, Omega Tau Sigma, Pi Kappa Alpha, Delta Theta Phi, Tau Epsilon Chi.

Medical and Dental Fraternities—Alpha Mu Pi Omega, Phi Rho Sigma, Alpha Kappa Kappa, Phi Chi, Xi Psi Phi, and Psi Omega.

The Women's Fraternities are as follows: Kappa Kappa Gamma, Kappa Alpha Theta, Pi Beta Phi, Delta Delta Delta, Delta Zeta, Delta Gamma, Alpha Phi, Phi Mu, and Alpha Gamma Theta.

The Cosmopolitan Club is a fraternal organization composed of members of the various nationalities who are enrolled in the University. The local chapter is affiliated with the National organization of Cosmopolitan Clubs of the United States.

Social and Section Clubs—There are many clubs that are organized largely for social purposes and the furthering of good fellowship among students who come from the same cities and counties of the state.

Rules Governing Initiation and Pledging into Fraternities

I—Initiation—No fraternity or sorority may initiate any student until he shall have fulfilled the following conditions:

(1) He shall have been in residence in this University for two semesters, or the equivalent thereof, and shall have registered for the third semester.

(2) He shall have obtained twenty-four hours credit for work done in this University.

Exception—Students in the College of Law shall be required to obtain twenty-one, instead of twenty-four hours credit.

II—Pledging

(1) No student entering the University in the first semester may be pledged before the following May 1st.

(2) No Student entering the University in the Second Semester may be pledged before the following December 15th.

III—Pledging and Initiation of Students entering with advanced standing—For students entering the University with advanced credit amounting to twelve hours or more, the prerequisites of pledging and initiation shall be twelve hours credit for work done in this University, residence for one semester, and registration for their second semester's work.

IV—Residence in Chapter Houses

(1) No student who is not an active member of the chapter occupying a chapter-house, or who is not one of its alumni or affiliates, may room or board in the chapter-house.

(2) No student initiated elsewhere may room in a chapter-house until he shall have fulfilled the conditions which by Rule I and Rule III are made prerequisite to initiation.

The above rule shall go into effect September, 1914.
